RoHS Declaration – Certificate of Compliance

Dear Customer,

in compliance with the European Regulations RoHS 2002/95/CE - Restriction of Use of Hazardous Substances in Electrical and Electronic Equipment), 2011/65/EU, 2015/863/EU and further updates, please take note of the following points:

- Vibrostop s.r.l. a socio unico can be qualified as "downstream user" or "producer of articles": no new substances are generated in the production processes of Vibrostop s.r.l. a socio unico and, therefore, there is no obligation of any registration
- in agreement with the information received from our suppliers, the substances subject to restriction are not used beyond the limits specified in Annex II of the Regulation and/or are not intentionally added. This does not exclude the possibility that they may be present in such concentrations as to be classified as impurities in connection with the raw materials and/or related production processes
- there are, however, two exemptions to what has been stated in the previous point, allowed by the regulation in Annex III of the regulation, namely
 - in point 6(a)-I "lead as an alloying element in steel for machining purposes containing up to 0.35% lead by weight and in hot-dip galvanized steel components in batches containing up to 0.2% lead by weight". This exemption could apply to Conic, Conic Marina, Metalflex, GSA, PFA, PGM, VPX, and VPQ series models
 - in item 6(c) "copper alloys containing up to 4% lead by weight." This exemption may apply to models in the SUPERFLEX, TSPF and certain specialty series
